

## **WARRANTY**

All Extreme Rage InflataField Bunkers have a **LIMITED 90 DAY WARRANTY ON MANUFACTURERS DEFECTS ONLY!**

Please note this does not cover punctures, ripping or tearing. These bunkers are tough but if you drive a stake through them while putting them in place they will leak, that's why there is a repair kit so you can fix leaks that occur during play or in the result of an accidental puncture.

What is covered? If a bunker leaks the first time you inflate it, Extreme Rage will replace it. If it leaks after you and six of your buddies jump on it they will not. In most cases if the unit does not leak the first time you use it, likely it was not defective. Use the repair kit to fix it if it leaks after a period of time.

The budgie cords that are used to tether the bunkers to the ground with the pegs are durable and will last for a long period of time. If you try to over inflate the bunkers or stretch the cords to tight they may come off the bunker. This is not a warranty item. These cords can be replaced with regular bungee cord purchased at your local hardware store. Extra caps are included in the repair kit that comes with the base kit and one is included with each individual bunker.

**Warranty Info for Extreme Rage Inflatafield has been provided to
